ATTRIBUTION FOR COLLECTIONS AND ADAPTATIONS (TASL)

The authors and sources of the individual works are to be named and the license conditions applicable to the individual elements of the collection/adaptation are to be indicated according to the "TASL" approach.

T=Title

A=Author

S=Source

L=License

For more information about attribution and the TASL approach see: https://wiki.creativecommons.org/wiki/

Using CC Licenses and CC-Licensed Works

UNIVERSITÄT DUISBURG ESSEN

Offen im Denken

ub | universitäts bibliothek

Reuse CC-licensed works

When reusing CC-Licensed Works, the most important thing to know is how to provide attribution for different possibilities of creation. In this context copying a CC licensed work and sharing it is pretty simple. But for changing and reusing a work it is essential to understand the difference between a **collection** and an **adaptation** in order to using the CC-Licenses correctly in the new work.

Collection

The bringing together of individual creative works in a thematic context without changing them is called a collection (e.g. songs or poems on a particular topic by different creators).
The license of the new collection applies only to newly created parts of the work (e.g. a foreword or a newly designed book cover).
A new collection may not contradict the licenses of the individual works. For example, if a work used in the collection is under one of Creative Commons' non-commercial licenses, it may not be used in a commercial collection.

Adaptation

An adaptation (or derivative work / remix) is based on the works of others, but is itself a work in its own right, original enough to be protected by copyright. Determining the originality of a work is often not easy and varies from copyright to copyright of a particular country. However, there are some typical cases of adaptations that are usually considered as such: The translation of a work from one language to another or the film version of a novel can serve as examples to illustrate the term.

When using works under a CC license for adaptation, it must be borne in mind that not all licenses are compatible. For example, a license that includes ShareAlike (SA) excludes others that are not identical (with the exception of a few non-CC licenses that serve the same purpose, for more information, see https://creativecommons.org/share-your-work/licensing-considerations/compatible-licenses/). When combining works that contain different versions of CC licenses, it is recommended to always use the latest version for the adaptation (currently 4.0).
Furthermore, it is best practice to include the most restrictive license element from the original works in your own license because it makes the re-use of your adaptation easier for others.
